

Horticultural News 1900-1999

1904

Mr. William Potter, of New Zealand, Calne, has dug 161 lbs. of Northern Star potatoes from 1lb. of seed which he planted in the spring. The biggest haulm weighed over 10½ lbs., and several weighed over 8lb. **Wiltshire Times, 15 October 1904** **OPC Note:-** A haulm is the number or weight of potatoes produced from a single plant when dug.
