

Durrington

Cheaper Coal for the Poor

We have much pleasure in stating, that the poor and labouring classes in the parish of Durrington are enabled to obtain their coal during the winter at the low rate of sixpence a bushel, in consequence of a liberal subscription entered into by Sir Edward Poore, Bart., Wm. Fowle, George Moore and Robert Pinckney, Esqrs., and other proprietors of land in that parish, the tenants having willingly aided this object by bringing the coals free of carriage.
